Ticks and Mosquitoes 30 Second PSA

For most of Alabama, ticks and mosquitoes are more abundant from late spring to early fall. If you spend time outdoors or have pets that go outside, you need to be aware of the diseases they can carry to help protect yourself and your family

Prevention is key in safeguarding against tick and mosquito-borne diseases. For more information and tips to help protect you and your family from these pests, visit our website at alabama-public-health-dot-gov.
