Selected Health Status Indicators

MACON COUNTY

Jointly produced to assist those seeking to improve health care in rural Alabama

By

The Office of Primary Care and Rural Health,
Alabama Department of Public Health
and
The Alabama Rural Health Association

Special thanks to the National Rural Health Association for funding assistance in the production of this publication.

April 2013
## SELECTED HEALTH STATUS INDICATORS
### United States, Alabama, and Macon County

1Rates, percentages, etc based upon fewer than 16 events may not be statistically reliable for specific analyses. “N.A.” is given for such indicators. Numbers of events, as well as measurements, are indicated using “N.A.” for some indicators in accordance with the data owner’s policy of not publishing smaller numbers of events.

**Sources of Information and Special Notes**

**Population Change 1910-2010:** U.S. Census Bureau, County Population Census Counts 1900-90, http://www.census.gov/population/cencounts/al190090.txt for 1910 data; U.S. Census Bureau, American FactFinder, Census 2010 Summary File 1 (SF 1) 100-Percent Data for 2010 data.

2011 Per Capita Personal Income: U.S. Bureau of Economic Analysis, Interactive Tables: Local Area Personal Income, Table CA1-3. http://www.bea.gov/iTable/ITable.cfm?ReqID=70&step=1#reqid=70&step=1&isuri=1

Primary Care Physicians in 2012: Medical Licensure Commission, Licensed Physician Data Base – 2012. National data is for 2010 and is obtained from the American Medical Association’s 2010 Physician Master File. National data was obtained from the Agency for Healthcare Research and Quality’s on-line publication, Primary Care Workforce Facts and Stats #1, at http://www.ahrq.gov/research/pcwork1.htm. All data has been adjusted to exclude licensed retirees and include only those actively practicing primary care. (In this publication, primary care physicians include family practitioners, internal medicine specialists, pediatricians, gerontologists, and obstetricians and gynecologists.)

Psychiatrists in 2012: Medical Licensure Commission, Licensed Physician Data Base – 2012. National data is for 2010 and is obtained from the American Medical Association, Physician Characteristics and Distribution in the US 2012, Table 1.2.

Households With No Vehicle in 2010: U.S. Census Bureau, American FactFinder, American Community Survey – 2010 or 2008-2010 or 2006-2010, Table B08210 – Household Size by Vehicles Available. Estimates are for 1-year, 3-years, or 5-years according to the population of each county.

Dialysis Patients and Dialysis Patients per Dialysis Station – 2013: Dialysis patients data by county was obtained by special request from Network 8, Inc. (http://www.esrdnetwork8.org) dated May 31, 2011. Dialysis stations by county was obtained from the Healthcare Facilities Directory, Alabama Department of Public Health (http://ph.state.al.us/facilitiesdirectory/(S(qc1vsw45hfl2iw45vbzbwini))/Default.aspx).

Cause of Death Indicators: Alabama Department of Public Health, Center for Health Statistics, Special queries of the 2009, 2010, and 2011 Mortality Statistics Files for Alabama data. Centers for Disease Control and Prevention, CDC Wonder Interactive Program, Detailed Mortality files for 2009 and 2010 (http://wonder.cdc.gov/). Deaths – Preliminary Data for 2011, Vol. 61, Number 6, October 10, 2012, Table 2. (Cause of death data included in this publication is not age-adjusted)

Low Weight Births - 2011: Alabama Department of Public Health, Center for Health Statistics, Special query of the 2011 Birth Statistics File and CDC WONDER Online Data Inquiry System, 2010 Births. (Births weighing less than 2,500 grams or 5 pounds and 8 ounces are defined as being of low weight.)

Births With Less Than Adequate Prenatal Care - 2011: Alabama Department of Public Health, Center for Health Statistics, Special query of the 2011 Birth Statistics File. (The Kotelchuck Index is used in determining adequacy of prenatal care. This index primarily considers the date when prenatal care was begun and the number of visits in determining adequacy.)

Births to Undereducated Women - 2011: Alabama Department of Public Health, Center for Health Statistics, Special query of the 2011 Birth Statistics File. (Women are considered to be “undereducated” when their years of education is at least two years less than what would be expected for someone of their age.)

Preterm births are those with a calculated gestation of less than 37 full weeks of pregnancy.

The number of students who graduated from public high schools in Alabama in 2011 with regular, advanced, and credit-based diplomas expressed as a percentage of the total number of students who enrolled as first year freshmen four years earlier (or in 2007-2008). While the denominator used in computing the rate includes graduates, completers, students still enrolled, students withdrawn but still enrolled, students who enrolled but failed to attend, dropouts, and “others,” it does not include students in the class of 2007-2008 who were retained from later classes. Data are adjusted for students who transferred into, and out of, the cohort over the four-year period. This method of measuring the graduation rate is referred to as the “four-year cohort graduation rate” and reflects efforts to conform to the National Governor’s Association recommendation in 2005 that states implement a common measure of graduation beginning with the 2010-2011 academic year. However, the methodology used in computing the cohort graduation rate remains subject to variation from one state to another

Adult Obesity - Percent of Population Aged 20+ in 2010: County Health Rankings & Roadmaps. The adult obesity measure represents the percent of the adult population (age 20 and older) that has a body mass index (BMI) greater than or equal to 30 kg/m2. Estimates of obesity prevalence by county were calculated by the CDC’s National...
Center for Chronic Disease Prevention and Health Promotion, Division of Diabetes Translation, using multiple years of Behavioral Risk Factor Surveillance System (BRFSS) data. BRFSS data are representative of the total non-institutionalized U.S. population over 18 years of age living in households with a land-line telephone.

**Adult Smoking - Percent of Population Aged 18+ in 2010:** County Health Rankings & Roadmaps. This measure was calculated by the National Center for Health Statistics using data from the Centers for Disease Control and Prevention’s Behavioral Risk Factor Surveillance System (BRFSS), a random-digit dial survey. BRFSS data are representative of the total non-institutionalized U.S. population over 18 years of age living in households with a land-line telephone. The estimates are based on seven years of data.

**Excessive Drinking - Percent of Population Aged 18+ in 2010:** County Health Rankings & Roadmaps. This measure was calculated by the National Center for Health Statistics using data from the Centers for Disease Control and Prevention’s Behavioral Risk Factor Surveillance System (BRFSS), a random-digit dial survey. BRFSS data are representative of the total non-institutionalized U.S. population over 18 years of age living in households with a land-line telephone. The estimates are based on seven years of data.

**Life Expectancy at Birth - 2011:** Alabama Department of Public Health, Center for Health Statistics, special request and Deaths – Preliminary Data for 2011, Vol. 61, Number 6, October 10, 2012, Table 6.

**New HIV Cases – 2009 through 2011:** Alabama Department of Public Health (ADPH), HIV Surveillance Branch. Any analyses, interpretation or conclusions reached from this data are those of the user and not the HIV Surveillance Branch. National data: HIV Surveillance Report, Diagnosis of HIV Infection in the United States and Dependent Areas, 2011, Vol.23, Table 1a. Note that national data is estimated to account for reporting delays and missing transmission.

**Child Abuse and Neglect Cases Reported to Child Protective Services for Investigation – October 2009 through September 2011:** Alabama Department of Human Resources, Child Protective Services, special request for FY 2010 and FY 2011. Please note that it is possible for there to be more than one report on the same family and the number of reports does not correspond with the number of children since reports can involve more than one child in a family.

**Adults Involved in Reported Abuse and Neglect Cases – October 2010 through September 2012:** Alabama Department of Human Resources, Adult Protective Services, special request for FY 2011 and FY 2012. Please note that it is possible for there to be more than one report on the same adult.

This and other county reports are available online at www.Arhaonline.org or www.adph.org/ruralhealth/
