

Continuing Education (CE) / Continuing Medical Education (CME)

Attestation Form – Stroke

The Alabama Department of Public Health’s Statewide Stroke System entry criteria are listed, by level, on the ADPH Acute Health System webpage available at <https://www.alabamapublichealth.gov/strokesystem/assets/RevisedStrokeDesignCriteriaMASTER021419.pdf>. The CE/CME requirements are included in the body and/or as a footnote. For an initial verification, reverification or change in stroke center status, a CE/CME Attestation Form may be submitted to ADPH in the application packet rather than individual training certificates.

The person signing the attestation form must be authorized to sign on behalf of the trauma center.

Any discrepancy between the attestation form, support documentation and continuing education requirements may delay the verification/reverification process.

All support documentation must be made available on request of ADPH.

By the signature below, I attest that I am familiar with the CE/CME requirements as set forth in the Stroke System Rules, that I have reviewed the CE/CME documentation provided by stroke care physicians/nurses and that all CE/CME requirements have been met.
