

Scott Harris, M.D., M.P.H.
STATE HEALTH OFFICER

February 28, 2022

Dear Alabama WIC Participant:

Alabama's WIC Program was notified the evening of February 17, 2022, that the Food and Drug Administration (FDA) issued a Public Health Advisory for powdered formulations of Similac[®], Alimentum[®], and EleCare[®]. On February 28, 2022, one lot of Similac PM 60/40[®] was added to the recall. These formulas were manufactured by Abbott Nutrition in their Sturgis, Michigan facility. According to our records, you may have been issued a potentially affected product by the WIC program.

Abbott Nutrition is voluntarily recalling these products after four consumer complaints related to *Cronobacter sakazakii* or *Salmonella* Newport in infants who had consumed powder infant formula manufactured in this facility. No distributed product has tested positive for the presence of either of these bacteria; however, routine testing is ongoing. As a proactive measure, the FDA is advising consumers not to use Similac[®], Alimentum[®], and EleCare[®] powdered infant formulas if:

- the first two digits of the code are 22 through 37 and
- the code on the container contains K8, SH, pr Z2, and
- the expiration date is 4-1-2022 (APR 2022) or later.

In addition, FDA is advising consumers not to use Similac PM 60/40[®] if the lot code is 27032K80 (can) / 27032K800 (case). At this time, this is the only type and lot of this specialty formula being recalled.

A picture of potentially affected product codes and where the code is printed on the product packaging is included with this letter. Products that do not contain the information listed above are not impacted by the advisories released on February 17, 2022, and February 28, 2022. This advisory is for powder formulas only and does not contain other physical formulations such as liquid concentrate or ready-to-feed. More information is available on FDA's website and Abbott's Similac Recall website listed below:

- <https://www.fda.gov/food/outbreaks-foodborne-illness/fda-investigation-cronobacter-and-salmonella-complaints-powdered-infant-formula-february-2022>
- <https://www.similacrecall.com/us/en/home.html>

If you have any of the affected formula, return the formula to the retailer (store) or WIC clinic where you obtained the product. Please understand available inventory may be limited. If you are unable to complete an exchange, WIC will arrange a reasonable substitute in coordination with your medical provider.

If you have questions or need assistance in locating the product code, please contact Abbott Nutrition Consumer Relations at 1-800-986-8540.

Sincerely,

Allison R Hatchett
